EDITORIAL

It is our privilege and responsibility as Health science professionals to promote good healthy life by exchanging information and ideas based on the experience. We acknowledge the universal nature of science which has revolutionized health science including dentistry in our time.

Progress in dental science has been nothing short of spectacular. It is now well establishes that systemic diseases or treatments can affect the oral cavity and conversely oral problems and treatments may effect general health.

The advances in technologies and knowledge in recent decades have created an immensely complex health care system. This complexity brings risks and evidence shows that sometimes things go wrong in patient's treatment no matter how dedicated and professional the doctors and their staff are. Therefore a systematic approach is required to ensure that the health care provided to patients is perfectly safe and errors in diagnosis, medication, surgery and other types of risks in health care are minimized, if not completely eliminated.

Dental colleges should arrange courses on "Patient-Safety".

INFORMATION FOR AUTHORS

Pakistan Oral & Dental Journal is a peer-review journal published quarterly a year (w.e.f. 2014 quarterly). It is bringing out 2 editions. One, usual print edition which is in your hand, and the online edition: www.podj.com.pk. The journal accepts original research reports, reviews, case reports, short scientific communications, letters to the editor and commentaries.

Manuscript submission: Manuscripts, should be prepared following uniform requirements for manuscripts submitted to biomedical journals as approved by the International Committee of Medical Journal Editors (www.icmje.org) (two hard copies and a CD copy) must be double-spaced and in English. Both British and American spellings are acceptable. The manuscript must be accompanied by a cover letter stating that the submitted work has not been published before and is not being considered for publication elsewhere and that it has been approved by all authors. The cover letter should also state that the particulars of authors namely qualifications, designations, addresses are accurate. This must also include the full postal address, telephone, fax, and e-mail of the first author. Acknowledgement of receipt is made by e-mail. Authors from foreign countries may submit their manuscripts electronically to the editor's email. In this case, the manuscript must be sent as a Microsoft Word attachment, with tables and references included as part of the Word text. Graphics have to be attached as jpg files.

Publication Charges: An article submitted for publication in this journal undergoes technical review, peer review, editorial review and then if accepted is sent for pre-publication proof checking and for printing and electronic publishing. Minimum publication charges for a manuscript are Rs 8500 upto 4 printed pages in the journal (in case of overseas US \$165). Rs1000/- extra will be payable for each additional page (in case of overseas US \$20). Charges for photographs, films, and illustrations are additional. Article should accompany the pay order for the said amount drawn in favor of "Pakistan oral and Dental Journal". If the article is not approved, Rs 2500 will be deducted as service charges and balance amount will be refunded. For clarification call on 051-2611187.

Plagiarism: Manuscripts are screened for plagiarism using special software and those found guilty or involved in publication misconduct are liable to be black listed.

Disclosure: Regarding source of funding and conflict of interest if any besides approval of the study from respective ethics committee/institution should be taken care of.

Conflict of Interest: Conflict of interest refers to a situation that has the potential to undermine the impartiality of an author because of the possibility of a clash between the author's self-interest and professional interest or public interest. All authors are required to disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications, and grants/funding. Acknowledging conflict of interest means that the reviewers and readers are made aware of the competing interests.

Manuscript preparation: Research articles are normally divided into following sections: Title page, Abstract, Introduction, Methodology, Results, Discussion, Acknowledgement (if any) and References. The editor reserves the right to edit all accepted manuscripts for clarity, conciseness and scientific style.

Methodology: Describe precisely how the study was carried out. Provide information about the sample of subjects, patients, materials or whatever was being studied, design of study and how it was executed. Include the method(s) of analysis of data that were used, and where relevant, mention the reliability of the methods of measurement.

Results: Describe data relevant to the objective(s)/hypothesis of the study in the form of text, tables and/or figures. The text summarizes the most important data presented in the tables/figures. Do not repeat all the contents of the tables/figures. Also describe the results of analysis of information (statistical tests).

Discussion: Illustrate the main findings of the study and how the findings compare with present and past knowledge. Describe possible reasons for any disagreement, and the author(s) interpretation of the results of the study. It may also include discussion of the materials and methods employed. Avoid repetition of the results. Mention implications of your findings, and any limitations of the study. Include any recommendations for future research based on your findings.

Conclusion(s): Number statement of your main findings. Conclusion(s) should relate directly to the aims and objectives of the study.

References: References should be numbered consecutively in the order in which they appear in the text. Identify references in texts, tables, and legends by Arabic numerals in superscript. The journal follows the Vancouver (now known as ICMJE) style of referencing. Avoid reference to "unpublished observations", "personal communications" and papers not yet accepted for publication.

Tables: Should be numbered consecutively in Arabic numerals (e.g., Table 1, Table 2, etc.), with each table typed on a separate page and with due attention to the proportions of the printed page. Do not document same data in tables and graphics.

Illustrations: All graphs, drawings, and photographs are labeled as figures and should be sequentially numbered in Arabic numerals (e.g., Fig 1, Fig 2, etc.). Each figure must be on a separate page and each must have a caption. In case of photographs, write the figure number and caption at the back of each photograph with top side indicated by an arrow sign. All captions, with necessary references should also be typed together on a separate page.

Correspondence: All correspondence must be addressed to Professor Ahmad Iqbal, Editor, Pakistan Oral & Dental Journal, 19, Street 63, F-7/3, Islamabad, Pakistan. E-mail: driqbal7@gmail.com website: www.podj.com.pk

Periodontics: Arginine-An instant relief for dentinal hypersensitivity — <i>Syed Imran Hasan, Ashar Afaq, Mehmood Hussain, Amna Arsalan, Moin Khan, Qaiser Ali Baig</i>	92
An update on reported oral health complaints — A study done at Sir Syed Dental Hospital — <i>Yousuf Moosa, Mahreen Shahzad, Tahera Ayub, Anam Sattar, Manahil Khalid</i>	96
Community Dentistry: Knowledge, perception and attitudes of dental undergraduate and postgraduate towards obesity — <i>Vishal Karera, Rizwan Nadim, Asma Naz</i>	99
The correlation of halitosis, oral hygiene practices and smoking habits among the undergraduate dental students of Karachi — <i>Marium Haroon, Sana Adeeba Islam, Samia Shiraz, Sherish Rahman, Anum Anjum, Gulenoor Mansoor</i>	105
Causes and pattern of permanent tooth extraction with frequency and type of replacement — <i>Syeda Lala Rukh, Syed Nasir Shah, Riaz Gul</i>	110
Self-reported hand hygiene practices among dentists in various dental institutes of Pakistan — <i>Muhammad Abdullah Kamran, Rabia Shafique, Muhammad Amjad, Azad Ali Azad</i>	114
A survey on patient's informed consent among dental practitioners of Lahore — <i>Phool Hussain, Gulzaib Ahmad, Muhammad Mudassar Saleem, Qurat ul Ain Anjum</i>	119
Restorative Dentistry: Job satisfaction among saudi public sector dentists in hail region — <i>Mohammad Aljanakh</i>	123
Knowledge of dentists regarding treatment of avulsed teeth in Karachi — <i>Syed Adeel Ahmed, Shama Asghar, Alina Nasir, Erum Rashid, Sara Ikram, Fasiha Kazi</i>	128
Prevalence of dental caries in garrison schools of Lahore — <i>Bilal Abdul Qayum Mirza, Asma Shakoora, Ali Anwaar, Fatima Tuz Zahra</i>	133
Knowledge of dentists regarding dental treatment during pregnancy in Karachi — <i>Alina Nasir, Shama Asghar, Syed Adeel Ahmed, Erum Rashid, Sara Ikram, Fasiha Moin</i>	137
The effect of different surface treatments on shear bond strength of a low shrinkage composite to enamel — <i>Mashaal M Bin Hasan</i>	142
Treated and untreated dental caries status and its co-variates in 5-6 years old children in Rawalpindi — A pilot study — <i>Benish Mehmood, Mehreen Riaz Faisal, Faiza Hassan, Erum Afzal</i>	148
Effect of grape seed extract on shear bond strength at resin-dentin interface — <i>Sohail Abbas Khan, Saira Khalid, Aamir Rafique, Hira Khalid</i>	152
Endodontics: Comparison of post operative pain frequency after single visit and multiple visits root canal treatment with rotary instruments on non-vital teeth — <i>Sharaz Ahmed, Alia Ahmed, Maria Sikander</i>	158
Prosthodontics: Frequency of colour vision deficiency among dental students — <i>Mariya Khalid, Mohammad Ali Chughtai, Hamad Ishtiaq Mian, Syed Nasir Shah</i>	161
Comparison of efficiency of polymethylvinylether-maleic anhydride (PVM-MA) based denture adhesive & carboxymethyl cellulose (CC) based denture adhesive — <i>Muhammad Sajjad, Shoaib Rahim, Saad Khan</i>	164
Awareness, attitude and behaviour trends in prosthodontic patients seen at Bahria University Dental Hospital, Karachi an exploratory study — <i>Anum Baqar, Saman Hakeem, Abid Mohsin, Moona Mumtaz, Daud Mirza</i>	168
Transfer of the maxillary cast to hanau articulator and its implementation: A syllabus based survey for undergraduates — <i>Jamroz Khan, Muhammad Fuad Khan Bangash</i>	173
Periodontal health of natural abutments in removable partial denture wearers — <i>Zulekha Younus, Zehra Maniya, Naseer Ahmed, Saba Faruqi, Rizwan Jouhar, Afsheen Maqsood, Hudebia Allah Bukhsh</i>	175
Effects of gender and facial profiles on the size of maxillary central incisors — <i>Khezran Qamar, Gotam Das, Permanand, Sajid Naeem</i>	179
Patient safety incidents in prosthodontics — <i>Ayesha Aslam, Zehra Iqtidar, Bushra Rehman, Afsheen Ali</i>	183
Xerostomia and its effect on complete denture stability — <i>Zehra Iqtidar, Ayesha Aslam, Sajid Naeem, Nazish Zafar, Umara Adeem</i>	188
Post-core retained tooth-supported maxillary fixed dental prosthesis: A case report — <i>Mohammed Rafique Moosa, Kashif Ikram, Zahid Akhter</i>	192
