Recognised by PMDC since 1982, by Higher Education Commission Government of Pakistan since 2006, by Pakistan Science Foundation since 1983 by WHO (EMR) since 1990, and by WAMA (World Association of Medical Journal Editors) since 2011.

EDITORIAL

The purpose of the undergraduate dental curriculum is to prepare future dental surgeons and dental specialists, however there is a lack of consensus in the adoption of a common educational model order to achieve this goal.

Dental profession has been considered the most stressful of all the health professions although the documented proof for this claim is still required. It is however, known that dental surgeons may experience occupational stress from their interaction with their patients and staff, fears of physical violence or litigation from their patients, concerns about their financial viability of their practice resulting from defective materials and equipment.

Researchers in Pakistan Dental Colleges are required to conduct studies to determine the degree of psychological distress and the experience of emotional exhaustion, and the extent of stress associated with course work and to compare these measurements with similar studies done in other developing countries, USA and Europe.

INFORMATION FOR AUTHORS

Pakistan Oral & Dental Journal is a peer-review journal published thrice a year (w.e.f. 2014 quarterly). It is bringing out 2 editions. One, usual print edition which is in your hand, and the online edition: www.podj.com.pk. The journal accepts original research reports, reviews, case reports, short scientific communications, letters to the editor and commentaries.

Manuscript submission: Manuscripts, should be prepared following uniform requirements for manuscripts submitted to biomedical journals as approved by the International Committee of Medical Journal Editors (www.icmje.org) (two hard copies and a CD copy) must be double-spaced and in English. Both British and American spellings are acceptable. The manuscript must be accompanied by a cover letter stating that the submitted work has not been published before and is not being considered for publication elsewhere and that it has been approved by all authors. The cover letter should also state that the particulars of authors namely qualifications, designations, addresses are accurate. This must also include the full postal address, telephone, fax, and e-mail of the first author. Acknowledgement of receipt is made by e-mail. Authors from foreign countries may submit their manuscripts electronically to the editor's email. In this case, the manuscript must be sent as a Microsoft Word attachment, with tables and references included as part of the Word text. Graphics have to be attached as jpg files.

Processing Charges: An article submitted for publication in this journal undergoes technical review, editorial review, peer review & then if accepted is sent for pre-publication proof checking & for printing & electronic publishing. Authors are required to share the processing costs which are calculated on the basis of length of the article, number of figures & whether they are to be published in black & white or in colour & number of print copies they want. If an article is rejected, then after deducting 33% amount as service charges from the amount deposited as publishing charges, balance amount will be refunded. An author can obtain the correct information by providing the above details through e-mail or phone (driqbal7@gmail.com or 0092-51-2611187).

Plagiarism: Manuscripts are screened for plagiarism using special software and those found guilty or involved in publication misconduct are liable to be black listed.

Disclosure: Regarding source of funding and conflict of interest if any besides approval of the study from respective ethics committee/institution should be taken care of.

Conflict of Interest: Conflict of interest refers to a situation that has the potential to undermine the impartiality of an author because of the possibility of a clash between the author's self-interest and professional interest or public interest. All authors are required to disclose any financial and personal relationships with other people or organizations that could inappropriately influence (bias) their work. Examples of potential conflicts of interest include employment, consultancies, stock ownership, honoraria, paid expert testimony, patent applications, and grants/funding. Acknowledging conflict of interest means that the reviewers and readers are made aware of the competing interests.

Manuscript preparation: Research articles are normally divided into following sections: Title page, Abstract, Introduction, Methodology, Results, Discussion, Acknowledgement (if any) and References. The editor reserves the right to edit all accepted manuscripts for clarity, conciseness and scientific style.

Methodology: Describe precisely how the study was carried out. Provide information about the sample of subjects, patients, materials or whatever was being studied, design of study and how it was executed. Include the method(s) of analysis of data that were used, and where relevant, mention the reliability of the methods of measurement.

Results: Describe data relevant to the objective(s)/hypothesis of the study in the form of text, tables and/or figures. The text summarizes the most important data presented in the tables/figures. Do not repeat all the contents of the tables/figures. Also describe the results of analysis of information (statistical tests).

Discussion: Illustrate the main findings of the study and how the findings compare with present and past knowledge. Describe possible reasons for any disagreement, and the author(s) interpretation of the results of the study. It may also include discussion of the materials and methods employed. Avoid repetition of the results. Mention implications of your findings, and any limitations of the study. Include any recommendations for future research based on your findings.

Conclusion(s): Number statement of your main findings. Conclusion(s) should relate directly to the aims and objectives of the study.

References: References should be numbered consecutively in the order in which they appear in the text. Identify references in texts, tables, and legends by Arabic numerals in superscript. The journal follows the Vancouver (now known as ICMJE) style of referencing. Avoid reference to "unpublished observations", "personal communications" and papers not yet accepted for publication.

Tables: Should be numbered consecutively in Arabic numerals (e.g., Table 1, Table 2, etc.), with each table typed on a separate page and with due attention to the proportions of the printed page. Do not document same data in tables and graphics.

Illustrations: All graphs, drawings, and photographs are labeled as figures and should be sequentially numbered in Arabic numerals (e.g., Fig 1, Fig 2, etc.). Each figure must be on a separate page and each must have a caption. In case of photographs, write the figure number and caption at the back of each photograph with top side indicated by an arrow sign. All captions, with necessary references should also be typed together on a separate page.

Correspondence: All correspondence must be addressed to Professor Ahmad Iqbal, Editor, Pakistan Oral & Dental Journal, 19, Street 63, F-7/3, Islamabad, Pakistan. E-mail: driqbal7@gmail.com website: www.podj.com.pk

Community Dentistry: Gingivitis among 8-15 years old children in LUMHS, dental OPD, Jamshoro — <i>Shazia Parveen Rajpar, Munir Ahmed Banglani, Sajjad Ahmed Rajpar, Fozia Rajput</i>	444
Restorative Dentistry: An in vitro evaluation of ability of dentaport root ZX for correct working length determination — <i>Adil Shahnawaz, Alia Ahmed, Muhammad Qasim Javed</i>	448
Dental caries in 7-12 year old and 16-21 year old army schools' students in Lahore — <i>Arham N Chohan, Ali Anwaar, Asma Shakoor</i>	452
Dental professionals experience regarding sharp injuries during practice — <i>Lubna Pasha, Huma Farid, Mehreen Riaz Faisal</i>	455
Difference in obturation quality in posterior teeth after manual and rotary canal preparation techniques — <i>Nouman Anayat, Ahmed Yar, Mamoona Mujtaba</i>	460
A comparison of the human pulpal pain response to biodentine and mineral trioxide aggregate as pulp capping agent — <i>Sidrah Shafaat Bokhari, Muzammil Jamil Ahmed Rana, Syeda Shazia Adeel, Maryam Muneer</i>	464
Rubber dam use by general dental practitioners – prevalence and obstacles to its use — <i>Afsheen Ali, Ayesha Aslam, Bushra Rehman, Anum Tariq</i>	468
Post operative pain comparison in single versus two visit endodontic treatment — <i>Omer Yousaf, Kashmala Aziz Khan, Fariha Naz</i>	472
Efficacy of naproxen in management of postoperative endodontic pain in teeth with irreversible pulpitis — <i>Sarah Shami, Zainab Subhan, Muzammil Jamil Ahmed Rana</i>	476
Comparison of prophylactic intraligamentary injection of piroxicam and lignocaine for management of postoperative endodontic pain — <i>Zainab Subhan, Sarah Shami, Muzammil Jamil Ahmed Rana</i>	480
Association of occlusal plane with the level of retromolar pad — <i>Syed Zahid Hussain Shah, Azad Ali Azad, Syed Hammad Hassan, Ayesha Aslam</i>	484
Impediments to the use of gingival retraction techniques — <i>Syed Hammad Hassan, Ayesha Aslam, Danish Azeem Khan</i>	487
Denture hygiene habits among elderly patients — <i>Haider Ali, Shawana, Samia Rahman, Ali Khalid, Ali Hassan</i>	492
Effect of pouring time on the dimensional stability of alginate impression material — <i>Usama Shafiq, Shoaib Rahim, Amna Saleem, Mehrunnisa Anwari</i>	495
Association of patient related factors with new complete dentures satisfaction — A Study — <i>Fahimullah, Muhammad Raza, Mohanmmad Sartaj Khan, Sadia Akram, Badshah Afsar</i>	498
Screening and treatment of completely edentulous patients on the basis of prosthodontic diagnostic index and the level of patient satisfaction — <i>Muhammad Aamir Ghafoor Chaudhary, Khezran Qamar, Sajid Naeem</i>	503
Clinical comparison of retention strengths of two denture adhesives — <i>Muhammad Farooq Kamran, Muhammad Aamir Ghafoor Chaudhary, Khezran Qamar</i>	507
Effect of gender and facial profiles on gingival display — <i>Gotam Das, Khezran Qamar, Sajid Naeem</i>	512
Dental Materials: Choice of material for fixed dental prosthesis; A Cross-sectional study — <i>Nida Zehra Bano, Jaffar Hussain Bukhari, Hashmat Gul, Muhammad Kaleem</i>	515
Comparison of endodontic sealers in terms of their shear strength — <i>Aamir Shahzad, Majid Zia, Talib Hussain, Amnah Sibghat</i>	520
Setting characteristics of three commercial vinyl polysiloxane impression materials measured by an oscillating rheometer — <i>Shahab Ud Din, Muhammad Hassan, Sandra Parker, Mangala Patel</i>	524
